Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Proposed Changes to Technical Specifications
Regarding the Removal of Organization Charts

Reference: (1) Generic Letter 88-06, "Removal of Organization
Charts from Technical Specification
Administrative Control Requirements," dated
March 22, 1988.

Dear Sir:

In accordance with Reference (1), this application for amendment to the Indian Point 3 Technical Specifications seeks to replace the organization charts contained in section 6.2 of Appendix A of the Operating License with more general organizational requirements. Elimination of the organization charts, figures 6.2-1 and 6.2-2, will not affect the safe operation of the plant, and will reduce the processing of license amendments regarding organizational structure. The NRC has approved a similar change for various other plants including Consolidated Edison's Indian Point Unit Nos. 1 and 2 on August 1, 1988.

Enclosed for filing is the signed original of a document entitled, "Application for Amendment to Operating License," together with one copy of Attachments I and II thereto, comprising a statement of the proposed changes to the Technical Specifications and the associated Safety Evaluation.

In accordance with 10 CFR 170.12, a check in the amount of \$150.00 is enclosed as payment of the application fee for the review of these proposed changes to the Technical Specifications.

In accordance with 10 CFR 50.91, a copy of this application and the associated attachments are being submitted to the designated New York State Official.
