Subject: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
Correction to Hydrogen Recombiner Operability and  
Surveillance Requirements Technical Specification Submittal.

Reference: 1. NYPA letter, R. E. Beedle to the NRC, "Proposed Changes to Technical Specifications Regarding Hydrogen Recombiner Operability and Surveillance Requirements," dated November 19, 1991.

Dear Sir:

The Authority proposed changing the Indian Point 3 technical specifications regarding Hydrogen Recombiner Operability and Surveillance requirements in a letter dated November 19, 1991 (Reference 1). Due to a typographical error, the letter, the affidavit and the safety evaluation, stated that changes are being proposed to section 4.5.A.2 (Hydrogen Recombiner and Containment Monitoring Systems). The changes are being proposed to section 4.5.A.3 (Hydrogen Recombiner and Containment Hydrogen Monitoring Systems).

If you have any questions, please contact Mr. P. Kokolakis.

Very truly yours,

  
**Ralph E. Beedle**  
Executive Vice President  
Nuclear Generation
