)
Docket No. 50-286

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

The New York Power Authority requests an amendment to the Technical Specifications contained in Appendix A to Facility Operating License DPR-64 for the Indian Point 3 Nuclear Power Plant. This application is filed in accordance with Section 10 CFR 50.90 of the Nuclear Regulatory Commission's regulations.

The proposed amendment to the Indian Point 3 (IP3) Technical Specifications reflects a management reorganization designed to improve operations at the plant. The management reorganization includes position title changes, the creation of two new senior level management positions on the same tier as Superintendent of Power, the reassignment of position responsibilities, and the proposed restructuring of the Plant Operating Review Committee (PORC). Additionally, miscellaneous changes not related to the reorganization include the correction of typographical and inadvertent errors made by previous amendments, and font and repagination changes.

The proposed changes to the Technical Specifications are presented in Attachment I to this Application for Amendment to the Operating License. The Safety Evaluation for the proposed changes is included as Attachment II.

New York Power Authority

Ralph E. Beedle
Executive Vice President
Nuclear Generation
