Subject: Indian Point 3 Nuclear Power Plant - Docket No. 50-286
Supplement to Refueling Water Storage Tank Boron Concentration
Increase and Related Technical Specifications Amendment Submittal.

Reference: 1. NYPA letter, R. E. Beedle to the NRC, "Proposed Changes to Technical
Specifications Regarding Refueling Water Storage Tank Boron
Concentration Increase and Related Technical Specifications," dated
December 20, 1991.

Dear Sir:

The Authority proposed changing the Indian Point 3 technical specifications regarding Refueling Water Storage Tank boron concentration and related technical specifications in a letter dated December 20, 1991 (Reference 1). Due to an administrative error, the letter, the affidavit and the safety evaluation stated that changes were being proposed to Section 3.2 (Chemical and Volume Control System) and Section 3.3.A (Safety Injection and Residual Heat Removal Systems). The changes are being proposed to Section 3.2 (Chemical and Volume Control System), Section 3.3.A (Safety Injection and Residual Heat Removal Systems) **and** Section 3.3.B (Containment Cooling and Iodine Removal Systems).

If you have any questions, please contact Mr. P. Kokolakis.

Very truly yours,

A handwritten signature in black ink, appearing to read 'R. Beedle', written over a horizontal line.
