Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
1992 Annual Final Safety Analysis Report Update

Dear Sir:

In accordance with the requirements of 10 CFR 50.71(e), the annual update of the Final Safety Analysis Report (FSAR) for the Indian Point 3 plant has been completed. This update incorporates information available as of January 22, 1992, and reflects changes to the plant which occurred during the twelve (12) month period ending on that date. Enclosed are ten (10) copies of the replacement pages reflecting these changes. Instructions for making the necessary page replacements are included.

FSAR Chapter 17, "Quality Assurance Program" has been revised to reflect title changes and update the cross references of implementing documents. These revisions do not reduce the commitments in the program description previously approved by the NRC. The program description demonstrates the Authority's continued compliance with Appendix B to 10 CFR 50. This satisfies the requirement of 10 CFR 50.54(a) to submit an annual update of the quality assurance program description.

If you have any questions, please contact Mr. P. Kokolakis.

Very truly yours,

Ralph E. Beedle
