Name: Dorian Quezada
Submitter's Representative: Other
Organization: AMU Student

General Comment

I would like to comment on Radiation - Emitting Products. The FDA ought to require manufacturers to notify users of the health hazard they are exposed. Constant exposure to radiation leads to various form of cancer and health issues. The FDA has the responsibility to review the safety of radiation emitting consumer products such as cell phones and wireless devices.

We cannot expose ourselves and love ones to radiation, especially, with devices we use daily. Federal agencies must make sure manufacturers are sending safe products to the market and disclose health hazard.
