Attention: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing

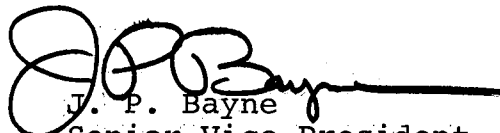

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Mid-Cycle Steam Generator Inspection

Dear Sir:

In accordance with the provisions of Item 2.J to Facility Operating License No. DPR-64, the Authority hereby submits the attached results of the inspection performed on Steam Generator No. 32 during the current mid-cycle outage. This inspection was performed utilizing the plan detailed in the Authority's August 28, 1980 letter (IPN-80-79) to you on the subject item.

The results presented in this report were verbally presented to members of your staff in phone conversations on October 16, 17 and 20, 1980. In a phone conversation on October 20, 1980, your Mr. L. Olshan indicated that the NRC's technical review of the inspection results were in general agreement with what the staff expected to see from this mid-cycle inspection. Your staff indicated that the results of the testing performed on Steam Generator No. 32 satisfies the requirements of Item 2.J for the mid-cycle steam generation inspection at Indian Point 3.

Very truly yours,

J. P. Bayne
Senior Vice President
Nuclear Generation
