Director of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Attention: Mr. Steven A. Varga, Chief  
Operating Reactors Branch No. 1  
Division of Licensing

Subject: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
NUREG-0737, Items II.B.1 and II.F.1,  
Attachment 3

Dear Sir:

This letter requests additional time to assemble the documentation required to be available or submitted by the subject requirements.

NUREG-0737, "Clarification of TMI Action Plan Requirements", Item II.F.1, Attachment 3 requires that by July 1, 1981, operating reactors have available for review the final design details of the implementation of the containment high-range radiation monitor. On December 30, 1980 (IPN-80-117) the Authority committed to comply with the Item II.F.1.(3) requirements.

Since our December 30, 1980 letter the Authority has determined that it will not be able to assemble these final design details until late August 1981.

The Authority has scheduled the installation of the high range monitor during our December 1981 refueling outage and intends to otherwise fully comply with the Item II.F.1.(3) position and clarification.

Similarly, the Authority cannot, at this time, submit the documentation required by Item II.B.1, Reactor Coolant System Vents. The majority of this documentation has been received at the Authority only within the past week. This task has been complicated due to necessary coordination with both the Authority's NSSS vendor and architect engineer. Collection of the remaining material and completion of internal review is estimated to occur in late July 1981.

P PDR

Aoak  
S/lo

The reactor vessel head vent system has also been scheduled for installation during our December 1981 refueling outage as required by Item II.B.1.

The Authority requests that the documentation due dates be extended as discussed above. Approval of this request will present no risk to the public health and safety.

Very truly yours,

  
J. P. Bayne  
Senior Vice President  
Nuclear Generation
