Attention: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Purging and Venting of Containment

Dear Sir:

This letter is provided to confirm discussions between NRC staff and Authority personnel concerning a revised submittal date for the purging and venting of containment information requested in your July 1, 1981 letter.

As discussed with Mr. Thoma, the NRC Project Manager for the Indian Point 3 Nuclear Power Plant, the Authority expects to provide the aforementioned information by November 30, 1981, contingent upon the expeditious completion of the current unscheduled steam generator outage. This extension request was necessary due to the potential impact that the unscheduled steam generator inspection outage could have on the analyses being performed for the aforementioned submittal. In addition, the unscheduled steam generator inspection outage has had an impact on manpower, which has hindered interface with consultants, review of consultants' reports, etc.

Should you or your staff have any questions, please contact us.

Very truly yours,

J. P. Bayne
