Director of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation

Subject: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
Control of Heavy Loads

Dear Sir:

Your letter dated July 31, 1980 requested a review of the controls for handling heavy loads at the Indian Point 3 Nuclear Power Plant, the implementation of certain recommendations regarding these controls, and the submittal of information to demonstrate that the recommendations have been implemented.

By letter dated June 22, 1981 (IPN-81-43), the Authority provided you with the information requested in Section 2.1 of Enclosure 3 to your July 31, 1980 letter. As indicated in the Authority's September 25, 1981 (IPN-81-72) letter and as discussed with Mr. Thoma, the NRC Project Manager for the Indian Point 3 Nuclear Power Plant, the Authority provides, herewith, the information requested in Sections 2.2, 2.3 and 2.4 of Enclosure 3 to your July 31, 1980 letter.

In the Authority's June 22, 1981 report, it was indicated that it was necessary to confirm that certain criteria in ANSI N14.6-1978 were met for the Reactor Vessel Head and Internal Lifting Rigs. We have reevaluated our previous response (item 3.d) on these devices and have determined that the information provided is sufficient to demonstrate adequate load handling reliability for these devices.

This submittal completes our response to all requests for information in your July 31, 1980 letter. Should you or your staff have any questions please contact us.

Very truly yours,

*C. M. Wilvesting*
