Aloha,

I live on Big Island and I understand that in Hawaii our island has the highest rate of cancer. Because of my concern for my island and my state, I'm writing to request independent monitoring for Pohakuloa and the eight other Training Ranges being granted a "permit to possess" depleted uranium. I also ask that an EIS be performed, a formal hearing be held for the community, decommissioning take place immediately, and to immediately start clean up of all ranges that have applied for a "permit to possess".

Mahalo,
