Attention: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Environmental Qualification of Safety-Related
Electrical Equipment - Technical Evaluation Report (TER) -
Proprietary Information

Dear Sir:

The Safety Evaluation Report (SER) for the "Environmental Qualification of Safety-Related Electrical Equipment" as transmitted in your December 30, 1982 letter indicated that the Franklin Research Center's (FRC's) TER may contain proprietary information since certain proprietary test reports and related documentation were utilized in its preparation. The Authority has transmitted copies of the TER to the Nuclear Steam Supply System (NSSS) supplier for review and identification of information which may require proprietary protection. The Authority's NSSS supplier has not completed this review to date. However, upon notification from our vendor, the Authority will promptly inform you of the specific rationale and justification for the protection from public disclosure of any portions of the identified pages which are determined to require proprietary protection.

Should you or your staff have any questions, please contact Mr. P. Kokolakis of my staff.

Very truly yours,

J. P. Bayne
Executive Vice President
