Subject: Fw: NRC Response

Importance: High

Mic called me yesterday afternoon and asked me to put together a one paragraph response for the NRC Form 590(?) - since he is sick I am forwarding to you.

Steve

Subject: NRC Response

As discussed in a phone conference between Mr. Steve Tilden, CBP Radiation Safety Officer (RSO), Mr. Mic McKeighan, CBP Deputy Director - Division of Occupational Safety and Health, and Dr. Sattar Lohdi, NRC Region 1, on 12 November, 2009; CBP has already taken steps to address this violation in training materials in all core VACIS and other Non-Intrusive Imaging courses provided by CBP. Training now clearly states that in the event of discovering an individual in a scan or scanning area, the scan must be suspended immediately. In addition to updating training, a Memo and muster topic for all CBP Officers was forwarded to the Assistant Commissioner, Office of Field Operations for signature and release on November 17, 2009. These documents will be forwarded to the RSO as soon as they are signed and released to the field.
