Attention: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
NUREG-0737; Item II.B.3
Post-Accident Sampling System

Dear Sir:

This letter serves to modify the Authority's letter dated December 2, 1983, IPN-83-97, regarding the subject NUREG-0737 Item. Specifically, the Authority committed to provide the results of an engineering evaluation of the representativeness of post-accident airborne particulate sampling of the containment atmosphere by the end of the second quarter of 1984. It has since been determined that approximately nine months of plant operation are needed to allow collection of empirical data, followed by three months of analysis to determine if any loss correction factors are necessary. Based on the current operating schedule for the Indian Point 3 station, the Authority expects to complete this item by June 1985.

Should you or your staff have any questions regarding this matter, please contact Mr. P. Kokolakis of my staff.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'J. P. Bayne'.

J. P. Bayne
Executive Vice President
Nuclear Generation
