Subject: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
Multi-Plant Actions (MPAs) Licensing Status

Reference: 1. NRC letter (J. D. Neighbors) to NYPA (J. C. Brons)  
dated May 1, 1986, concerning IP-3 MPAs listing.

Dear Sir:

Reference 1 forwarded the NRC listing of Multi-Plant Actions (MPAs) applicable to the Indian Point 3 facility. This listing was provided with a request that the Authority review these items and provide the associated completion or projected completion dates as appropriate.

Attachment I to this letter provides the Authority's partial response in the form of a listing markup. The dates provided are based on the latest Authority letters to the NRC, license amendment effective dates, modification packages, plant procedures, NRC Safety Evaluation Reports, various internally generated documents or the expected completion dates.

It should be noted that the enclosures to Reference 1 do not in all cases identify the specific issues. It is anticipated that some items will necessitate additional clarification. This effort will be coordinated with the NRC IP-3 Project Manager.

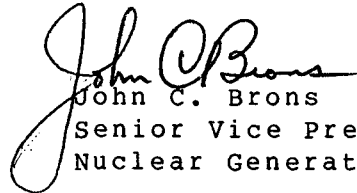

The dates provided in the attachment to this letter are consistent with the Authority's understanding of the specific issue and associated action. The response is not complete because of the limited time available for research and review of documentation. The Authority will continue to review additional documentation and provide an updated list by September 1, 1986.
