Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Interfacing System LOCAs

Reference: 1. Letter from Mr. S. A. Varga to Mr. J. C. Brons,
dated April 7, 1987 which transmitted the
Brookhaven National Laboratory draft report
entitled, "Interfacing System LOCA at PWRs."

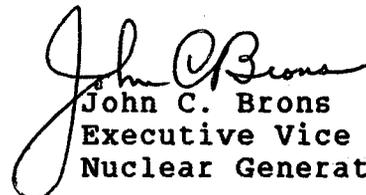

Dear Sir:

The Brookhaven National Laboratory (BNL) draft report entitled, "Interfacing Systems LOCA at PWRs" was provided by Reference 1. After review of this document, it was apparent that not all available information concerning interfacing system LOCAs was incorporated in the study.

The "Source Term Safety Assessment" study performed for Indian Point 3 and Amendment 2 to the Indian Point Probabilistic Safety Study (IPPSS) both provide valuable information concerning interfacing system LOCAs. Based on discussions with the BNL staff, there is agreement that the information in these documents should be made available for review. Accordingly, a copy of each document is provided for use in conducting the study.

Should you or BNL have any questions regarding this matter, please contact Mr. P. Kokolakis of my staff.

Very truly yours,

John C. Brons
Executive Vice President
Nuclear Generation
