Mr. Kevin Williams  
Chief, Licensing and Inspection Branch  
Division of Preparedness and Response  
Nuclear Security and Incident Response  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555-0001

Ref: Federal Emergency Management Agency's (FEMA) Interim Finding Report (IFR) for Reasonable Assurance (RA) of the Offsite Emergency Response Plans for the North Anna Power Station (NAPS) Unit 3 Combined License (COL) Application

Dear Mr. Williams:

Please find enclosed the IFR for RA for NAPS Unit 3, submitted by the Radiological Emergency Preparedness (REP) Program staff from the FEMA Region III office. Region III staff have reviewed the information received on December 1, 2009, pertaining to the offsite radiological emergency plans for the NAPS Unit 3 COL application. Plans were reviewed against the fifteen (15) planning standards in NUREG-0654 FEMA REP-1, Revision 1.

Based on our thorough review of plans submitted, and the currently available offsite plans and procedures for the 10-mile Emergency Planning Zone, as well as the 50-mile Ingestion Pathway Zone, FEMA has determined that the plans are adequate, and there is Reasonable Assurance that the plans can be implemented with no corrections needed.

Should you or members of your staff have any questions regarding this matter, please contact Ms. Bonnie Sheffield at 202-212-2120 or Mr. Nathaniel Yates at 202-212-2125.

Sincerely,

A handwritten signature in blue ink, appearing to read "Vanessa E. Quinn".

Vanessa E. Quinn  
Chief  
Radiological Emergency Preparedness Branch

Enclosure: As stated
