THRU: G. W. Knighton, Chief, Environmental Projects Branch No. 1, L

PHONE CONVERSATION WITH REGION II EPA OFFICE ON CONSOLIDATED EDISON  
COMPANY - FWPCA - SECTION 402 PERMIT FOR INDIAN POINT UNITS NOS. 1  
AND 2

On July 1, 1974, I talked with Harvey Lumenfeld, Chief, Energy and  
Thermal Source Water Section, Regional Office II of Environmental  
Protection Agency, regarding the issuance of the Section 402 permits  
under the FWPCA of 1972 for Consolidated Edison Company's Indian Point  
Units Nos. 1 and 2. On June 28, 1974, a public notice with the 402  
permits for Units Nos. 1 and 2 was issued to Con Ed requiring cooling  
towers by July 1, 1978. Copies of the permits will be sent to me  
within the next few days.

Lumenfeld stated that statutory requirements resulted in selection of  
cooling towers by 1978 based on EPA's "best technical judgement on a  
national level." The chances for the water quality guidelines changing  
appear to be pretty slim. He could not understand why the Appeal  
Board changed the date for cooling towers for Unit No. 2 until May 1979.  
I will arrange to send a copy of ALAB-188 to him. Con Ed will have  
30 days to file for a Section 316 (a) waiver.

At the F.A.B. meeting, on June 19, 1974, N. Sachs, Con Ed attorney,  
said Con Ed will take EPA up to the Supreme Court to fight the require-  
ment for cooling towers for steam generating plants.

Con Ed has not applied for a Section 402 permit for Unit No. 3. EPA  
also requested a meeting be held to discuss the IP case and the  
requirements and timing for cooling towers.
