Tami (and Mark)-

I spoke with Melanie Townley at SCDHEC yesterday and she said that the spill prevention plan is usually included as a BMP in the construction permit as a requirement for operation- so not required by construction permit during construction. However, she thought that the stormwater permit may cover prevention of impacts to gw during construction. She contacted the SCDHEC person over that area and forwarded me their response, which I have attached to this email. The point- spill plan is a part of the BMP required in the Stormwater Pollution Prevention Plan. The attachment contains the relevant section of the SWPPP addressing spill prevention as applicable to construction.

This is Item 7 on the To-Do list from Lance and appears to apply to Sections 4.2, 5.2, and 7.2 of the EIS.

Thanks

Dan

thanks Nancy. I forwarded this to Dan Barnhurst. The item that I was asked to help with (which I've conveniently delegated to Dan) is to determine what SCDHEC's guidance or recommendations are in this matter. I assume Mark has reviewed these items in the reading room and has determined we need the SCDHEC information to make sure SCE&G's plan is in line with anything that agency recommends or requires.

But this email is a good double check on that assumption. (We are all going so fast and furious that these checks and balances are very helpful to minimize the amount of stuff we miss.)

Hi Tami,

I just remembered you were looking for these formal titles. SCE&G provided these three plans in the reading room, so we can't cite directly.

Spill Prevention, Control, and Countermeasures Plan and Facility Response Plan" (SCE&G 2009a|ER p. 5.2-6|)

Also,

Stormwater Pollution Prevention Plan
Site Environmental Management Plan
