PROGRAM SCOPE

Licensee is a biomedical laboratory located in Ann Arbor, Michigan. Licensee uses invitro kits of iodine 125 for research. This inspection was a follow up to prior escalated enforcement where the licensee had inappropriately disposed of material to the sanitary sewer system.

Performance Observations

The inspector toured the facilities and interviewed authorized users and staff members. Licensee has since ceased to dispose of material to the sanitary sewer system. All materials are now collected and held for decay in storage. The inspector reviewed the licensee procedure for decay in storage as well the storage facility and the manifest for waste stored in the facility. All are current.

No abnormalities were noted during this inspection.
