Dear Mr. Macatangay,

In response to your request for clarification on Item #5; at this time Mid River Asphalt, Inc. only possesses a Seaman C-300, Serial Number 21040. The source for this is Radium 226. The C-300 has a maximum quantity of .0045 (according to manufacturer). This is to specify that Mid River Asphalt, Inc. does not possess the other machines; C-200 or C-75. Also Mid River Asphalt, Inc. does not possess any other sources; we have no AM-241 or CS 137.

Mid River Asphalt, Inc. does not have any intention to acquire or rent any machines; Mid River Asphalt, Inc. will hire a company if circumstances require another machine.

I hope this clears up any confusion.

Respectfully,

A handwritten signature in black ink, appearing to read "Fred Schuman", is written over the "Respectfully," text.

Fred Schuman  
Radiation Safety Officer

RECEIVED DEC 16 2009

December 10, 2009

Memo To: Radiation Safety Officer

From: President

Subject: Delegation of Authority

You, Fred Schuman, have been appointed Radiation Safety Officer and are responsible for ensuring the safe use of radiation. You are responsible for managing the Radiation Protection Program; identifying radiation protection problems; initiating, recommending, or providing corrective actions; verifying implementation of corrective actions; stopping unsafe activities; and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations where justified to maintain safety. You are required to notify management if staff does not cooperate and does not address radiation safety issues. In addition, you are free to raise issues with the Nuclear Regulatory Commission at any time. I will carry out these responsibilities to the best of my ability.
