ATTN: Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Subject: UniStar Nuclear Energy, NRC Docket No. 52-016
Response to Request for Additional Information
Calvert Cliffs Nuclear Power Plant, Unit 3,
RAI No. 45, Instrumentation and Control Systems Important to Safety; and
RAI No. 66, Post Accident Monitoring Variables

Reference: UniStar Nuclear Energy Letter UN#09-450, from Greg Gibson to Document
Control Desk, U.S. NRC, Response to RAI No. 45, Instrumentation and Control
Systems Important to Safety, and RAI No. 66, Post Accident Monitoring
Variables, dated October 20, 2009

The purpose of this letter is to provide updated schedule information for the responses to Requests for Additional Information (RAI) 45 and RAI 66. RAI 45 addresses Instrumentation and Control Systems Important to Safety, as discussed in Section 7.4, and RAI 66 addresses Post Accident Monitoring Variables, as discussed in Section 7.5 of the Final Safety Analysis Report, as submitted in Part 2 of the Calvert Cliffs Nuclear Power Plant (CCNPP), Unit 3 Combined License Application (COLA), Revision 6.

The referenced letter anticipated that the responses would be provided by December 18, 2009, following determination of the final inventory of Post Accident Monitoring (PAM) variables and the resulting impact on Technical Specifications. UniStar Nuclear Energy continues to work closely with AREVA to coordinate the changes to the COLA and U.S. EPR FSAR associated with implementation of the PAM variables list. It is anticipated this issue will be resolved in time to support RAI 45 and RAI 66 responses to the NRC by February 26, 2010.

There are no regulatory commitments identified in this letter. This letter does not contain any proprietary or sensitive information.
