

50-3

December 21, 1978

Docket Nos. 50-2  
and 50-247

Consolidated Edison Company  
of New York, Inc.  
ATTN: Mr. William J. Cahill, Jr.  
Vice President  
4 Irving Place  
New York New York 10003

Gentlemen:

The Commission has issued the enclosed Amendment No. 19 to Facility License No. DPP-5 and Amendment No. 43 to Facility License No. DPP-26 for Indian Point Station, Unit No. 1 and Indian Point Nuclear Generating Plant, Unit No. 2, respectively. These amendments consist of changes to the Technical Specifications in response to your requests dated April 20, 1977 and May 27, 1977.

These amendments revised the Technical Specifications to allow use of morpholine in the secondary side and its discharge to the river when used, and made a change in an entrainment survival sampling station.

We have evaluated the potential for environmental impact of plant operation in accordance with the enclosed amendments. The amendments do not affect the concentration limit for morpholine (0.1 ppm) found in our Final Environmental Statement for Indian Point No. 2 and, therefore, will not result in any significant environmental impact. The change in the entrainment survival sampling station insures that the organisms collected had actually passed through Indian Point No. 3 and not through Indian Point No. 2. Therefore, it will provide more useful data. This change also will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR 51.5 (d)(4) that an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

The use of morpholine was discussed in the Final Safety Analysis Report for Indian Point Unit No. 2, which was reviewed and approved by our staff. Therefore, these amendments do not involve new safety information of a type not considered by a previous Commission safety review of the facility. It does not involve a significant increase in the probability

Gentlemen:

The Commission has issued the enclosed Amendment No. to Facility License No. DPR-5 and Amendment No. to Facility License No. DPR-26 for Indian Point Station, Unit No. 1 and Indian Point Nuclear Generating Plant, Unit No. 2, respectively. These amendments consist of changes to the Technical Specifications in response to your requests dated April 20, 1977 and May 27, 1977.

These amendments revised the Technical Specifications to allow use of morpholine in the secondary side and its discharge to the river when used, and change in entrainment survival sampling station.

We have evaluated the potential for environmental impact of plant operation in accordance with the enclosed amendments. The amendments do not affect the concentration limit for morpholine (0.1 ppm) found in our Final Environmental Statement for Indian Point No. 2 and, therefore, will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR §51.5 (d)(4) that an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

The use of morpholine was discussed in the Final Safety Analysis Report for Indian Point Unit No. 2, which was reviewed and approved by our staff. Therefore, these amendments do not involve new safety information of a type not considered by a previous Commission safety review of the Facility. It does not involve a significant increase in the probability of consequences of an accident, does not involve a significant decrease in a safety margin, and therefore does not involve a significant hazards consideration. We have also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by this action.
