

DEC 11 1982

Docket Nos. 50-3
and 50-247

Mr. John D. O'Toole, Vice President
Nuclear Engineering and Quality Assurance
Consolidated Edison Company
of New York, Inc.
4 Irving Place
New York, New York 10003

Dear Mr. O'Toole:

The Commission has issued the enclosed Amendment No. 31 to Provisional Operating License No. DPR-5 for the Indian Point Station Unit No. 1 and Amendment No. 82 to Facility Operating License No. DPR-26 for the Indian Point Nuclear Generating Unit No. 2. These amendments consist of changes to the Technical Specifications and the Facility Operating License No. DPR-26 in response to your application transmitted by letter dated August 31, 1982.

These amendments modify the Technical Specifications in several different areas as follows:

- (a) The Facility Organization Structure is modified to include the position of Operations Superintendent for both Units 1 and 2.
- (b) Testing requirements have been modified on containment isolation valves for Unit 2 only.
- (c) Technical Specifications involving snubbers have been revised to reflect the redesign of the support systems of certain safety-related pipe lines for Unit No. 2 only.

The amendment also modified the Facility Operating License No. DPR-26 by deleting license condition 2.D.(1) concerning steam generator inspections. The requirements of license condition 2.D.(1) have been completed and similar perpetual requirements were made part of the Technical Specifications by Amendment No. 81 issued October 21, 1982.
