Dear Mr. Aschenbach:

Thank you for your response.

However, Ms. Laura Quinn is now the NRC Environmental Project Manager for Calvert Cliffs Unit 3. Please address further correspondence to her at

e-mail: Laura.Quinn@nrc.gov
phone: (301) 415-2220

address:
US Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, Maryland 20852-2738

I sent a copy of your e-mail to Ms. Quinn.

Sincerely,

Thomas Fredrichs

DGIF previously reviewed and provided comments re: the proposed Calvert Cliffs Nuclear Power Plant near Solomons, Maryland. We subsequently received notification that additional Maryland sites are being considered. Based on our review, our existing comments remain valid.

Email: tlf@nrc.gov

We have reviewed the NEPA document scoping request submitted as part of a combined license for construction and operation of one new nuclear power plant at the Calvert Cliffs Nuclear Power Plant near Solomons, Maryland.

Based on the project's location within Maryland, our fisheries biologist did not indicate that the project would impact fisheries resources under our jurisdiction. If additional information regarding potential impacts to resources under our purview becomes available, please contact this office.

Thank you for providing this opportunity to contribute comments.
