Docket No. 50-247

Consolidated Edison Company of New York, Inc.
ATTN: Mr. William J. Cahill, Jr.
            Vice President
4 Irving Place
New York, New York 10003

Gentlemen:

Our review of Indian Point 2 Technical Specifications and your letter
of December 3, 1973 related to installed filter systems indicates a
need for additional Limiting Conditions for Operation (LCO) and
Surveillance Requirements. These are required in order to ensure high
confidence that the systems will function reliably, when needed,
at a degree of efficiency equal to or better than that assumed in the
accident analyses.

In order to assist you in the preparation of appropriate revisions, we
have prepared model Technical Specifications which include LCO's,
Surveillance Requirements and Bases for the following Indian Point
Unit 2 systems:

    1)   Control Room Air Treatment Systems

    2)   Containment Air Treatment System

    3)   Fuel Handling Air Treatment System

You are requested to submit by January 30, 1975, an application for
amendment to your license that would change the Technical Specifications
related to installed filter systems so as to be in conformance with the
requirements in the enclosed model Technical Specifications.

                              Sincerely,

                              Original Signed

                              George Lear, Chief
                              Operating Reactors Branch #3
                              Directorate of Licensing
