Consolidated Edison Company
of New York, Inc.
ATTN: Mr. William J. Cahill, Jr.
Vice President
4 Irving Place
New York, New York 10003

Gentlemen:

The Regulatory staff is developing standard technical specifications and has completed the section on "Administrative Controls", a copy of which is enclosed. We have reviewed the present section on "Administrative Controls" in your Technical Specifications and administrative controls that you recently proposed for Indian Point Unit 2. Based on our review, we have determined that the administrative controls for Unit 2 should be revised to be consistent with the format and content of the standard section. The standard section incorporates the recommendations of the recently issued Regulatory Guide 1.16, "Reporting of Operating Information Appendix A Technical Specifications" Revision 2, of which a copy is also enclosed. Regulatory Guide 1.16 describes the information that is needed to permit assessment by the Commission of safety related activities during the operating life of facilities.

Accordingly, you are requested to submit by December 1, 1974, a proposed change to the section on "Administrative Controls" in your technical specifications and proposed changes to any other parts of your technical specifications that must be changed for consistency, such as the definition of "abnormal occurrence". Please provide justification for any departure from the standard section on "Administrative Controls" or Regulatory Guide 1.16.

Sincerely,

Original Signed

George Lear, Chief
Operating Reactors Branch #3
Directorate of Licensing

Enclosures:

- Standard Administrative Controls
- Regulatory Guide 1.16
