Re: Indian Point Unit No. 2
Docket No. 50-247

Dr. Peter A. Morris, Director
Division of Reactor Licensing
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Dr. Morris:

Enclosed herewith are forty (40) copies of Westinghouse Nuclear Energy Systems Class 3 Report, WNET-102, "A Technical Report on Steam Generator Tubesheet Cladding."

The contents are an evaluation of the integrity of nuclear steam generator tubesheet cladding and in particular, a report of a failure incident and subsequent field restoration of portions of explosively clad tubesheets. Extensive analyses and conclusive results are included to demonstrate cladding integrity on all Westinghouse steam generator tubesheets, including that resulting from repair procedures performed.

We have been informed by the Westinghouse Electric Corporation that the proprietary notice found on the cover page of this report should be disregarded and that this non-proprietary report may be placed in the Public Document Room.

Very truly yours,

William J. Cahill, Jr.
Vice President
