CONSOLIDATED EDISON COMPANY ) Docket No. 50-247  
OF NEW YORK, INC. )  
(Indian Point Station, )  
Unit No. 2) )

APPLICATION FOR AMENDMENT TO  
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, Consolidated Edison Company of New York, Inc. ("Consolidated Edison"), as holder of Facility Operating License No. DPR-26, hereby requests amendment of Section 2.B of that license and amendment of the Technical Specifications contained in Appendix A to that license.

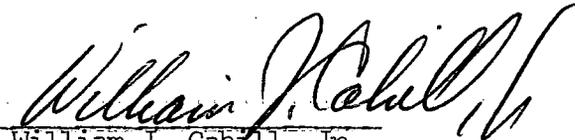

The proposed changes to Section 2.B of the license, contained in Attachment A to this Application, would incorporate generalized provisions for possession and use of byproduct, source and special nuclear materials in lieu of the present method of listing individual items separately. In addition, the proposed Technical Specification changes, contained in Attachment B to this Application, would incorporate specific leak testing and surveillance requirements for sealed sources in the Technical Specifications. A Safety Evaluation of the proposed revisions is presented in Attachment

8111060013 780321  
PDR ADOCK 05000247  
P PDR

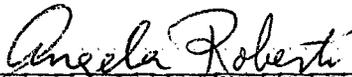

C to this Application. This evaluation demonstrates that the proposed changes do not represent a significant hazards consideration and will not cause any change in the types or increase in the amounts of effluents or any change in the authorized power level of the facility.

FACILITY OPERATING  
LICENSE REVISIONS

I. Delete existing paragraphs 2.B.(2) and 2.B.(3) of Facility Operating License No. DPR-26 and rewrite as follows:

- 2.B. (2) Pursuant to the Act and 10 CFR Part 70, to receive, possess, and use at any time special nuclear material as reactor fuel, in accordance with the limitations for storage and amounts required for reactor operation, as described in the Final Facility Description and Safety Analysis Report, as supplemented and amended, and as described in the Commission's authorization for Amendment No. 14 to this license.
- (3) Pursuant to the Act and 10 CFR Parts 30, 40 and 70, to receive, possess and use at any time any byproduct, source and special nuclear material as sealed neutron sources for reactor startup, sealed sources for reactor instrumentation and radiation monitoring equipment calibration, and as fission detectors in amounts as required;
- (4) Pursuant to the Act and 10 CFR Parts 30, 40 and 70, to receive, possess and use in amounts as required any byproduct, source, or special nuclear material without restriction to chemical or physical form, for sample analysis or instrument calibration or associated with radioactive apparatus or components;

II. Renumber existing paragraph 2.B.(4) as 2.B.(5):

- (5) Pursuant to the Act and 10 CFR Parts 30 and 70, to possess, but not separate, such byproduct and special nuclear materials as may be produced by the operation of the facility.
