AMENDMENT NO. 1 TO
APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

On March 30, 1977, Consolidated Edison Company of New York, Inc. ("Consolidated Edison"), as holder of Facility Operating License No. DPR-26, filed with the U.S. Nuclear Regulatory Commission an "Application for Amendment to Operating License" sworn to by Mr. William J. Cahill, Jr. on March 23, 1977. That Application requested changes to Table 3.12-1 of the Indian Point Unit No. 2 Technical Specifications to reflect redesign of the support systems of certain safety-related pipe lines for the purpose of improving the reliability of those support systems.

Consolidated Edison hereby amends its March 23, 1977 Application to effect further typographical, editorial and technical changes to Table 3.12-1 and Section 4.12 of the Technical Specifications. The proposed changes as described in the Safety Evaluation of Attachment B to the March 23, 1977 Application are still requested but the proposed technical specification page revisions contained in Attachment A of that Application are superseded by those contained in Attachment A of this Amendment.

These new proposed pages incorporate those changes requested by our March 23, 1977 Application as modified and supplemented by this Amendment.

A Safety Evaluation of the proposed changes is set forth in Attachment B to this Amendment. This evaluation demonstrates that the proposed changes do not represent a significant hazards consideration and will not cause any change in the types or an increase in the amounts of effluents or any change in the authorized power level of the facility.
