Re Indian Point Unit No. 2
Docket No. 50-247

Mr. Robert W. Reid, Chief
Operating Reactors Branch # 4
Division of Reactor Licensing
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Reid

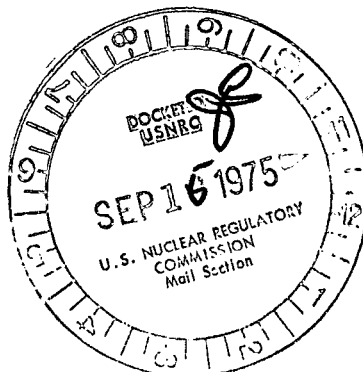

In response to Mr. George Lear's letter of June 12, 1975, the Consolidated Edison Nuclear Facilities Safety Committee has reviewed the proposed spent fuel pool modification for Indian Point Unit No. 2 which was submitted to the Commission on May 9, 1975, and has concluded that the planned modification does not constitute an unreviewed safety question within the meaning of Section 50.59(a) (2) of the Commission's regulations.

The basis for this conclusion is described in an attachment to this letter.

Very truly yours

William J. Cahill, Jr.
Vice President
