Director of Nuclear Reactor Regulation
ATTN: Mr. A. Schwencer, Chief
Operating Reactors Branch #1
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Schwencer:

During the past nine months, we have been providing information to the Regulatory Staff concerning the status of the PWR Steam Generator Chemical Cleaning research project being performed by Con. Edison under a Department of Energy contract. We appreciate the comments provided by the Regulatory Staff during Phase I of this project. Phase I is now complete, and we herewith transmit 40 copies of the report for your information. We would welcome any comments and suggestions by the Regulatory Staff.

We are now evaluating the results of Phase I and will evaluate the results of additional work currently in progress to decide, whether or not steam generator chemical cleaning will be scheduled at Indian Point Unit No. 2. We will continue to keep the Regulatory Staff fully informed of the results of this research project as they become available.

Very truly yours,

William J. Cahill, Jr.
Vice President
