Re: Indian Point Unit No. 2
Docket No. 50-247

Director of Nuclear Reactor Regulation
ATTN: Mr. Victor Stello, Jr., Director
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

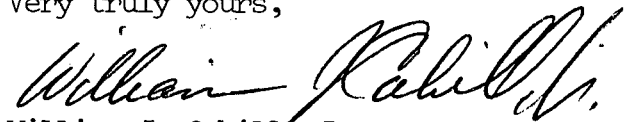

Dear Mr. Stello:

We are in receipt of your January 25, 1978 letter to all PWR licensees regarding the generic reactor vessel support issue. As explained in our letters of December 8, 1975, July 8, 1976, December 9, 1976 and June 17, 1977, we and our NSSS vendor would, following completion of the Indian Point Unit No. 3 analysis, evaluate the applicability of that analysis to Unit No. 2 in order to complete our response to this generic issue.

This evaluation is nearing completion and indicates that the analysis performed and modifications proposed for Unit No. 3 will be applicable to Unit No. 2. It is expected that the final evaluation will be provided to the Regulatory Staff by June 15, 1978.

Very truly yours,

William J. Cahill, Jr.
Vice President
