Re: Indian Point Unit
Nos. 2 & 3
Docket Nos. 50-247
50-286

Director of Nuclear Reactor Regulation
ATTN: Mr. Robert W. Reid, Chief
Operating Reactors Branch No. 4
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Reid:

By letters dated September 14, 1977 and October 27, 1977 you requested certain information regarding fracture toughness and the potential for lamellar tearing of the Indian Point Unit Nos. 2 & 3 steam generator and reactor coolant pump support materials.

Accordingly, our NSSS vendor is presently compiling the plant design data necessary to prepare the requested response. Originally they had anticipated this task to be completed by March 1, 1978. This compilation of plant data is now scheduled for completion and transmittal to Con Edison by May 1, 1978. It is now expected that responses to your questions can be provided June 1, 1978.

Very truly yours,

A handwritten signature in cursive script that reads 'William J. Cahill, Jr.'.

William J. Cahill, Jr.
Vice President
