Re: Indian Point Unit No. 2
Docket No. 50-247

Director of Nuclear Reactor Regulation
ATTN: Mr. Robert W. Reid, Chief
Operating Reactors Branch No. 4
Division of Operating Reactors
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Reid:

In accordance with my letter to you of December 9, 1976, this letter is to inform you of our schedule for completing the reassessment of the Indian Point Unit No. 2 reactor vessel support system. Our contractor has advised us that this analysis is presently scheduled for completion by March, 1978. The results of this analysis and a description of any proposed modifications will be submitted promptly thereafter.

Because of design similarities between Indian Point Unit No. 2 and Indian Point Unit No. 3, we anticipate that the results of the reactor vessel support analysis and proposed modifications for Unit No. 2 will be similar to those submitted to the Commission on June 15, 1977 for Unit No. 3. However, since there are structural differences between the two units, separate analyses and calculations specific to Unit No. 2 are necessary before potential design modification details can be established.

We will keep your staff informed as to the status of this project.

Very truly yours,

A handwritten signature in cursive script, appearing to read "William J. Cahill, Jr.".

William J. Cahill, Jr.
Vice President
