REGULATORY DOCKET FILE COPY

March 10, 1977
Re: Indian Point Unit No. 2
Docket No. 50-247

Director of Nuclear Reactor Regulation
ATTN: Mr. Karl R. Goller
Assistant Director for
Operating Reactors
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Goller:

My letter to you of February 22, 1977, stated that an outage to perform the Indian Point Unit No. 2 steam generator reinspection was scheduled to begin on March 28, 1977. However, to avoid concurrent outages of major power plants in the Con Edison electrical system, it may be necessary to reschedule the planned reinspection.

As discussed with members of your staff, we now anticipate the start of this outage between March 28, 1977, and April 15, 1977.

Very truly yours,

William J. Cahill, Jr.
Vice President
