SUSQUEHANNA STEAM ELECTRIC STATION
NUPIC JOINT AUDIT OF CAMERON MEASUREMENT SYSTEMS
NUPIC AUDIT # 20319 **NUPIC SUPPLIER # 1785**
PLE-0024855

On behalf of PPL, I want to express my appreciation for the hospitality and support afforded the audit team during the conduct of the subject audit.

This letter and attached Audit Report #20319 transmit the results of the PPL Susquehanna, LLC /NUPIC Audit of the Cameron Measurement Systems Quality Assurance Program. The audit was conducted at your City of Industry, CA facility on November 09 through November 13, 2009. The attached audit report will be made available to NUPIC members upon request.

The audit team was led by Mr. David P. Glockner of PPL Susquehanna, LLC. with participating audit team members from Ameren Corporation, Exelon Corporation, Xcel Energy Corporation, and First Energy Corporation. Technical support was provided by Xcel Energy Corporation and PPL Susquehanna, LLC.

The purpose of this audit was to verify implementation of your quality program for nuclear safety-related pressure & differential pressure transmitters, switches, indicators, sensors, and related parts, repairs, and calibration.

This audit determined that Cameron Measurement Systems is effectively implementing their Quality Assurance Program to the requirements of 10CFR50, Appendix B, 10CFR21, ANSI N45.2 and ASME/ANSI NQA-1-94. As a result, there were no findings generated, and this audit is now closed.

Thank you again for the courtesy and cooperation extended to the audit team. Should you have any questions concerning this audit, feel free to contact Mr. David P. Glockner 610-774-6892, or by e-mail at dpglockner@pplweb.com.

Respectfully,

A handwritten signature in cursive script that reads "Charles F. Brown".
