Subject: Moore Ranch open issue submittals

Jon -

We've recently received two submittals addressing open issues identified during public conference calls on May 11, July 27, and August 18, 2009 for the Moore Ranch review. The first submittal, dated December 4 and addressing open issues from the May 11 call, is available in ADAMS under Accession Number ML093440306. The second submittal, dated December 10 and addressing open issues from the July 27 and August 18, is in the process of being added to ADAMS.

The cover letter included with the second submittal (dated December 10) identified eight specific open issues that Uranium One plans to address within the next 30 days. As outlined in the August 18, 2009 meeting summary (ML092520565), the staff is curtailing any further work until the open issues are resolved. Please note that at this point the staff cannot complete its review until Uranium One addresses the remaining eight open issues for the Moore Ranch review.

Doug
