RE: CONSOLIDATED EDISON COMPANY - INDIAN POINT 2
CO REPORT NO. 247/69-9.

The subject report provided much valuable information on a number of important items. It was considered to be EXCELLENT. However, the report was found to be deficient in that the serious difficulties that DRAVO experienced with the piping supplied by Associated Steel Company (Tube Associates) was not highlighted in the summary or transmittal memorandum. As you know, regulatory has been deeply interested in the piping problems, particularly Tube Associates.

I personally feel that the failure to highlight a certain situation or condition in an inspection report is equivalent to a positive statement of its relative insignificance.

bcc: F. J. Nolan, CO
