**AMENDMENT NO. 10 TO INDEMNITY AGREEMENT NO. B-19 - CONSOLIDATED EDISON COMPANY (INDIAN POINT UNIT NO. 2) 50-247**

The Division of Reactor Licensing intends to issue Facility License No. DPR-26 to the Consolidated Edison Company providing for fuel loading and subcritical testing of the Indian Point Unit No. 2 pending completion of other items at which time it will be licensed to operate.

Effective on the date of the issuance of DPR-26, we intend to amend Indemnity Agreement No. B-19 to delete coverage for material license SNM-1108 which provided for preoperational storage of fuel for the reactor (Unit 2) under construction pursuant to Construction Permit CUPR-21 and substitute instead coverage under License DPR-26 and modify the indemnified location to be that of the sites and bounds site provided to us by Leonard Trester's letter of December 10, 1970. Financial protection of \$82 million is already in effect covering Indian Point Unit No. 1 and therefore no increase in financial protection is required.

The indemnity fee for the new license should remain at the minimum fee of \$100 per year inasmuch as criticality and operations are not yet authorized. At such time as operation is authorized under DPR-26 we will notify the Controller to increase the indemnity fee.
