APPLICATION FOR AMENDMENT TO
OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, Consolidated Edison Company of New York, Inc., as holder of the Facility Operating License No. DPR-26, hereby applies for an amendment to the Indian Point Unit No. 2 Technical Specifications contained in Appendix A to that License.

The proposed change to the Technical Specifications would increase the accumulator water volume specified in Section 3.3.A.1c and the Bases for this Section. The proposed revised pages are set forth in Attachment A to this Application. Attachment B to this Application is a safety evaluation of the requested amendment. This evaluation demonstrates that the proposed changes do not represent a significant hazards consideration and will not cause any changes in the types or increase in the
