Docket No. 50-247

Consolidated Edison Company of New York, Inc.
ATTN: Mr. William J. Cahill, Jr.
Vice President
4 Irving Place
New York, New York 10003

Gentlemen:

The Commission has issued the enclosed Order for Modification of License for the Indian Point Nuclear Generating Unit No. 2 pertaining to your proposed Technical Specifications which were submitted pursuant to Section 50.46 and Appendix K of 10 CFR Part 50. The enclosed Safety Evaluation Report contains the bases for our action.

A copy of the Order is being filed with the Office of the Federal Register for publication. This Order is effective immediately.

Within 30 days after receipt of this letter, we request that you inform us of your submittal date for the reevaluation required by paragraph 1 of Section III of the Order.

You will note that the order requires that a reanalysis in conformance with the order must be submitted along with any request for authorization for any core reloading. In order to provide for sufficient time for our review of your reanalysis, you should assure that such submittal is provided at least 45 days prior to your schedule of initiation of operation following approval of such reloading. You should also note, that since your current analysis was based upon your presently authorized fuel loading patterns, any modification of fuel design or core configuration which affects the basis for the analysis will require staff approval.

Sincerely,

151

George Lear, Chief
Operating Reactors Branch #3
Directorate of Licensing
