Dear Ms. Simmons:

Saint Louis County Department of Health, Environmental Health Laboratories, located at 111 South Meramec, Clayton, Missouri, has transferred three Nickel-63 foil sources from our facilities to the manufacturer, Varian Analytical. A licensed representative of Varian removed, packaged, and transported the three Nickel-63 sources after wipe testing showed no leakage of radioactivity. We have enclosed the Radioactive Material Certificate of Transfer from Varian Analytical Instruments documenting the transfer.

We would like to amend our NRC Material License No. 24-11263-01 to reflect these changes as follows:

From Item 6 remove sub item H.

6. Byproduct, source, and/or special nuclear material	7. Chemical and/or physical form	8. Maximum amount that licensee may possess at any one time under this license
H. Nickel-63	Foil source (Tracor Detector cell Model 114800-3201 or Model 111019)	3 cells not to exceed 15 millicuries each

From Item 11, remove "Licensed material listed in Sub item 6.H. may also be used by Wayne Wilhelm."

Please contact me if you need any other documentation to complete this amendment.

Regards,
