Docket No. 50-247

OCT 26 1971

Mr. Edward J. Bauser  
Executive Director  
Joint Committee on Atomic Energy  
Congress of the United States

Dear Mr. Bauser:

Pursuant to the Orders of the Atomic Safety and Licensing Board dated July 20, 1971, and October 15, 1971, respectively, the Atomic Energy Commission has issued Facility Operating License No. DPR-26 (two copies enclosed) to the Consolidated Edison Company of New York, Inc. The license permits fuel loading and subcritical testing of the Indian Point Nuclear Generating Unit No. 2. The reactor is designed for operation at approximately 2758 megawatts thermal, but in accordance with the provisions of Facility Operating License No. DPR-26 and Technical Specifications appended thereto, is restricted to fuel loading and subcritical testing and at no time shall the reactor be made critical following fuel loading. Two copies of a related notice which has been forwarded to the Office of the Federal Register for filing and publication are enclosed for your information.

Two copies of the Orders which permit fuel loading and subcritical testing of the Indian Point Nuclear Generating Unit 2 of the Atomic Safety and Licensing Board are also enclosed.

Sincerely,

Original Signed by C. K. Beck
