Attention: Mr. Albert Schwencer, Chief  
Operating Reactors Branch No. 1  
Division of Operating Reactors

Subject: Indian Point 3 Nuclear Power Plant  
Docket No. 50-286  
Analysis of Line 351 (Problem No. 401) for  
I. E. Bulletin 79-07

Dear Sir:

In response to Mr. L. Olshan's April 14, 1979 verbal request, this letter transmits the pipe stress analysis performed for line 351 (problem no. 401) in accordance with I. E. Bulletin 79-07.

The review of the 'as-built' configuration indicated minor dimensional changes. It was determined that the effect of these changes on calculated pipe stress, support loads and equipment nozzle loads would be negligible. Therefore pipe stress analysis performed earlier was considered to be consistent with 'as-built' configuration.

The analysis transmitted by this letter contains Arthur D. Little proprietary information and is covered by the affidavit transmitted with our April 24, 1979 letter entitled, "Response to I. E. Bulletin 79-07". This information is intended solely for use by the NRC and it is requested that it be withheld from public disclosure.

Very truly yours,

*Paul J. Early*
