Reference: Your letter dated May 23, 1975
In response to our letter dated April 30, 1975

Gentlemen:

Thank you for informing us of the corrective and preventive actions you documented in response to our correspondence. These actions will be examined during a subsequent inspection of your licensed program.

Relative to your expressed concern about the "Notice of Deviation," the purpose of the "Notice of Deviation" is to direct your attention to activities within your plant which do not meet now current codes, guides, standards, or current practices. The request to reply to this notice is to obtain from you a commitment as to how you will reach the objective of these codes, guides, standards or current practices. As stated in your letter, you are correct that "Notice of Deviation" does not constitute an item of noncompliance with specific requirements placed on you.

Should you have additional questions, we will be pleased to discuss them with you.

Sincerely,

James P. O'Reilly
Director
