To Whom it May Concern,

On the U.S. NRC website heading it states "Protecting people and the environment". If this is your logo then why are you considering allowing Energy Solutions Inc. to make Utah it's nuclear waste dumping ground for the world? As a concerned citizen we do not need Utah or any other American state to have to contend with nuclear waste from another country. I am an American citizen of the state of Utah and I am totally against any nuclear waste to be dumped in the state of Utah or our adjoining state of Nevada. Why should we, our children and grandchildren have to live in an environment contaminated with nuclear waste, just so Energy Solutions INC. can make billions of dollars with no consideration for the health and welfare of the states effected. We all need to stand up and fight for our rights to stop this dastardly effort by Energy Solutions Inc. Our health and well being is at stake. What we need to do is dig a large hole and dump Energy Solutions Inc. in it..I would gladly be there to dig the hole and help cover it up.

Sincerely,

Robert Olsen
