Attachments: Label1.jpg; NRC Amendment 9 REVISED Request 123109.pdf

Mr. Torres:

My name is Jason Hoag; I am the deputy RSO for Energy Laboratories, Casper, and was asked to respond to your request for additional information regarding our NRC license amendment by our RSO, Dee Fairservis.

In regard to your first inquiry (as received below), the duplication of the curium-244 was a typo, we only need the one isotope of Curium. I have attached a revised copy of the amendment to this email in which the duplication has been corrected.

As to your second inquiry, I have attached a picture of the standards container displaying the label in question. I was unsure if you simply needed written confirmation that this label was affixed to the container, or if you needed more substantial evidence. Please let me know if this is adequate.

If you require any further information, please contact myself and/or Dee Fairservis.

Sincerely,
Jason Hoag

Subject: Request for additional information

Mr. Poelstra:

Please provide the following information in support of your license amendment request letter dated October 22, 2009 (see attachment).

1. See table on pages 1 and 2 of the amendment request letter. Items F and G repeat Curium-244, any form, 10 microcuries. Is this a duplication or was your intent to request Curium-244 and another isotope of Curium? Please clarify.

2. You requested removal of Plutonium-239 from the license based on 10 CFR 70.19. To remove Pu-239 from the license I need to verify that the four Pu-239 reference sources bear a label which includes the statement or substantially similar statement which contains the following information:

"The receipt, possession, use and transfer of this source, Model --- ---, Serial No. -----, are subject to the general license and the regulations of the United States Nuclear Regulatory Commission or of a State with which the Commission has entered into an agreement for the exercise of regulatory authority. Do not remove this label. Caution -- Radioactive Material -- This source contains plutonium. Do not touch radioactive portion of this source."

Please confirm that such a statement or similar language with key word "general license" is included in each calibration or reference standard.

Note that if the Pu-239 sources are removed from the license you have to comply with the general license requirements describes in 10 CFR 70.19(a), (b), (c) and (d).

Thank you.

Roberto J. Torres
