Subject: DFP – waste disposal cost estimate for LSC vials

(NOTE: This will be used as the
Documents Title in ADAMS)

Although the cost estimate for the 2009 DFP was somewhat increased from the 2006 DFP, the cost estimated for disposal of LSC vial waste was significantly decreased. I spoke with the RSO, and she stated that, given the changes in the uses of licensed materials at the facility, most of the LSC vial wastes that they are generating now meet the 'less than 0.04 uCi/ml' regulation limits, and so the cost is substantially less. She also used the 3-year average cost this time, rather than the 5-year average used previously, and that also was reflected in the decreased average cost.

Action Required: telecon to file.
