Subject: Extension Request

Mr. Ryder,

Westinghouse hereby requests an extension in the date for the response to U.S. Nuclear Regulatory Commission Inspection Report No. 70-1151/2009-204 and Notice of Violation, Dated December 18, 2009. The instructions direct Westinghouse to respond within 30 days of the date of the letter transmitting the Notice of Violation. This letter was received today (January 4th, 2010) at the facility.

In order to adequately address this NOV, Westinghouse requests additional response time of 30 days to ensure the immediate corrective actions are complete and the actions to prevent reoccurrence meet both Westinghouse Management and NRC expectations. Westinghouse is currently in the process of conducting a Root Cause Analysis for one of the violations and the results of that Root Cause will be used to ensure the corrective actions to prevent recurrence are robust. In addition, with the current regulatory workload and documentation required to be completed and submitted to NRC in the month of January, the resources to address the NOV and support the Root Cause Team are limited. The same resources are involved in the IAEA additional protocol reporting and Integrated Safety Analysis Summary updates which are required to be completed in January.

Regards,

Gerard Couture
